

ERTP External Providers Program

Effective April 2020

The External Provider Program is an integral part of the Environmental Response Training Program (ERTP) in that training courses can be presented to individuals not able to attend courses conducted by the U.S. EPA ERTTP training contractors. External Providers can present U.S. EPA ERTTP courses that are identical in scope and application that the training contractors provide. The fact that External Providers must meet and accept the requirements set forth by the U.S. EPA to be in the program indicates a high degree of professionalism, quality, and competency.

The organizations listed are authorized to present one or more of the following courses:

- Air Monitoring for Emergency Response (AMFER)
- Emergency Response to Hazardous Materials Incidents (ERTHMI)
- Hazardous Material Technician (HMT)
- Hazardous Waste Operations and Emergency Response (HAZWOPER 40-Hr)
- Sampling for Hazardous Materials (SFHM)

For specific information about the locations, dates, and courses presented by these External Providers, contact the appropriate person or organization listed.

To learn about the External Provider Program, including how to become an External Provider, you can visit <https://ertpvu.org/ExternalProviders.aspx> or contact the External Training Coordinator.
